

# JavaScript Cycles

---

## 01 Basic JavaScript Examples

### 1. Write text with JavaScript

```
<html>
<head>
</head>
<body>

<script type="text/javascript">
    document.write("Hello World!");
</script>

</body>
</html>
```

### 2. Write HTML tags with JavaScript

```
<html>
<body>

<script type="text/javascript">
    document.write("<h1>Hello World!</h1>");
</script>

</body>
</html>
```

### 3. JavaScript in the body section

```
<html>
```

```
<head>
```

```
</head>
```

```
<body>
```

```
<script type="text/javascript">
```

```
document.write("This message is written  
by JavaScript from BODY SECTION");
```

```
</script>
```

```
</body>
```

```
</html>
```

## 4. JavaScript in the head section

```
<html>
<head>
<script type="text/javascript">
function message()
{
alert("This alert box was called with the onload event
defined in HEAD ECTION");
}
</script>
</head>

<body onload="message()" >
This message is from BODY SECTION
</body>
</html>
```

## 5. An external JavaScript

```
<html>
<head>
</head>
<body>

<script type="text/javascript" src="xxx.js">
</script>

<p>
The actual script is in an external script
file called "xxx.js".
</p>

</body>
</html>
```
